

## Envisioneer 4.5c3 Update

The following is a list of technical issues that have been resolved in the Envisioneer 4.5c3 update, as well as product enhancements.

### *New!* **Vector Printing**

Vector printing is now used by default in Worksheet View, resulting in sharper, higher-quality images regardless of any scaling. Also, a new program setting allows you to disable vector printing if necessary and revert to the standard raster method.

### *New!* **Print All Colors as Black**

When printing from Worksheet View using the default vector printing method, this new setting in the Print dialog gives you the option of printing a black-and-white image instead of a color image.

### **Import/Export DWG**

Various issues regarding the import and export of DWG files have been resolved, resulting in a cleaner transfer of information.

### **Collision Control**

Issues involving the display and behavior of objects when they are being placed in the corner of a room have been resolved.
